Work Plan Addendum - A1 Addl Characterization 3-20-15.pdf

Robyn,

Here is the work plan addendum for West Lake in response to our technical planning session January 23. Haven't seen their comment responses yet but will forward once received. Please review and let me know if you have any issues or concerns. Hoping to turn this around in 1 week if at all possible.

Thanks,

**Subject:** Work Plan Addendum - Phase 1D Investigation

Brad,

On behalf of the West Lake OU-1 Respondents, we have prepared the attached addendum to the prior Phase 1 GCPT Investigation and Phase 1B/1C Soil Boring Investigation Work Plans prepared by Feezor Engineering, Inc. on behalf of Bridgeton Landfill, LLC that were previously approved by EPA. The attached addendum describes the scope and procedures to be used to perform additional characterization of the extent of RIM occurrences in the southwestern and western portions of Area 1 which we are terming the Phase 1D investigation.

Please be advised that the figure showing the locations of the prior and proposed additional borings is best printed on 11 x 17 paper.

Please let us know if you have any questions or desire any additional information with respect to the Phase 1D investigation or any other aspect of our work at the West Lake Landfill.

Thank-you and have a great weekend, Paul
